

Jesús Mendoza Verduzco

Colima, México • [linkedin](#) • [github](#) • +52 312 112 52 86 • loginlock22@gmail.com • Spanish (Native) • English (Fluent)

Over 6 years of experience as a Software Developer. Key member of the development team for the AIS web platform at AI27. Led FrontEnd development at Xilion.io, achieving improvements across all products, web performance, and creating a unified POS platform. Specialized in React/NextJS and Java/Spring Framework. Passionate open-source contributor with strong problem-solving skills and a focus on clean code, performance optimization, and modern development practices.

TECHNICAL SKILLS

Frontend: React 18, NextJS, TypeScript, JavaScript ES6+, Zustand, Redux, Context API, HTML5, CSS3, Tailwind CSS, Atomic Design
Backend: Java 8/11, Spring Boot, Spring MVC, Spring Data JPA, Hibernate, Laravel, PHP, RESTful APIs, Microservices Architecture
Databases: PostgreSQL, MySQL, Database Design & Optimization, SQL Query Performance Tuning
DevOps & Tools: Git, Maven, Gradle, Linux, CI/CD pm2, Bash Scripting, Docker
Testing: JUnit, Jest, React Testing Library, Unit Testing
Additional: Here Maps API, Mathematica, Agile/Scrum, Code Review, Mentoring

PROFESSIONAL EXPERIENCE

AI27 Predictive Intelligence S.A.P.I. de C.V.

Senior Frontend Developer

Mexico City, Mexico

July 2024 – Present

- Led complete front-end migration of AIS platform (Artificial Intelligence-powered logistics system) from legacy architecture to modern React 18 with TypeScript, improving maintainability and reducing technical debt by 60%.
- Architected and implemented atomic design system with reusable components, reducing development time for new features by 40%
- Integrated Zustand for global state management, replacing prop-drilling patterns and improving application performance by 25%
- Optimized data loading through pagination and lazy loading strategies, reducing initial page load time from 4.5s to 1.2s
- Implemented comprehensive unit testing coverage (85%+) using Jest and React Testing Library, ensuring code reliability
- Integrated Here Maps API to render dynamic polylines for real-time vehicle tracking on interactive maps
- Collaborated with backend team to design efficient API contracts and data structures for AI-driven predictions
- Established code review processes and best practices documentation, mentoring 3 junior developers
- Consumed RESTful APIs built with Spring Boot for real-time AI predictions and data visualization

Xilion.io & Kiotrack S.A de C.V.

Full Stack Developer

Colima, Mexico

September 2018 – July 2024

- Architected and developed a unified component library and tooling platform using React, NextJS, and TypeScript, enabling 5+ products to share common UI elements and accelerating feature delivery by 50%

- Designed and implemented CI/CD using pm2 and bash scripts, automating build, test, and deployment processes, reducing deployment time by over 80% (from 2 hours to 20 minutes) and minimizing production errors by 70%
- Led web performance optimization initiative for Yimi Web and Yimi POS platforms, implementing code splitting, lazy loading, and image optimization, improving Lighthouse scores from 45 to 92
- Created real-time performance monitoring dashboards using custom metrics and analytics, enabling data-driven decisions for optimization strategies
- Pioneered adoption of React and NextJS in the organization, building POCs and training 5+ developers on modern frontend architecture
- Developed cross-platform desktop applications in Java 8 and 11 using JavaFX and Swing, implementing MVC architecture with JDBC for database connectivity, serving 200+ concurrent users
- Built and maintained RESTful APIs using Spring Boot and Spring MVC, handling authentication, authorization, and business logic for kiosk management system
- Designed complex relational databases for kiosk monitoring and bus GPS tracking systems, optimizing queries for real-time data processing with 99.9% uptime
- Centralized monitoring data from 100+ kiosks into a unified web administration platform using Spring MVC, JSP, and PostgreSQL, providing real-time dashboards for operations team
- Integrated third-party payment APIs and hardware SDKs for point-of-sale systems
- Mentored junior developers on Java best practices, Spring Framework, and React development

OPEN SOURCE CONTRIBUTIONS

- Active contributor to React and NextJS ecosystem projects
- Maintain just-barcode-hook with 50+ weekly downloads on npm
- Maintain loginlock-kit with 20+ weekly downloads on npm
- Active participant in open-source communities
- Regular contributor to technical discussions on GitHub and Stack Overflow

EDUCATION

Universidad ICEP

Bachelor's Degree in Computer Systems Engineering

Highlight: Social Service at Archivo Histórico del Estado de Colima (AHEC)

Colima, Mexico

May 2024

Tecnológico Nacional de México - Campus Colima

Computer Systems Engineering

Highlight:

- 1st Place - ENEIT Local 2017
- 2nd Place - ENEIT Regional 2017
- National Finalist - ENEIT with "Vita Data" healthcare data analytics project

Colima, Mexico

May 2021

Universidad Politécnica de Querétaro

Delfin Research Summer Program

Project: Developed greedy search algorithms in Mathematica for finding modified extended minimum-cost cycle paths, optimizing route planning efficiency by 35%

Queretaro, Mexico

June - July 2018
