

JESÚS MENDOZA VERDUZCO

FULLSTACK SOFTWARE ENGINEER — FRONTEND FOCUS

Colima, Mexico | +52 312 112 52 86 | loginlock22@gmail.com | LinkedIn | GitHub

SUMMARY

Frontend-focused FullStack Software Engineer with 7+ years of experience building web applications, REST APIs, desktop software, and cloud services. Strong in React, TypeScript, and Next.js, with professional backend experience in Java 8/17, Spring Boot, Spring MVC, JSP, Node.js, Express, Laravel, and PHP. Experienced across architecture, performance, databases, CI/CD, cloud infrastructure, and production deployments.

EDUCATION

Bachelor's in Computer Science (Ingeniería en Sistemas Computacionales) — Universidad ICEP (ICEP University), Colima, Mexico | May 2024
Bachelor's in Computer Systems Engineering (Ingeniería en Sistemas Computacionales) — Tecnológico Nacional de México (National Technological Institute of Mexico), Campus Colima (Colima Campus), Mexico | May 2021
Summer Research Program — Delfin (Programa de Investigación de Verano Delfin) — Universidad Politécnica de Querétaro (Polytechnic University of Querétaro), Mexico | Jun–Jul 2018

EXPERIENCE

AI27 Predictive Intelligence S.A.P.I. de C.V. — FullStack Software Engineer — Frontend Focus

Mexico City, Mexico | Jul 2024 – Sep 2026

- Led frontend modernization and feature development for AIS using React and TypeScript, covering trips, transport lines, operators, devices, licenses, routes, monitoring, and operational workflows.
- Migrated shared application state from React Context to Zustand across a large portion of the frontend, improving organization and scalability.
- Integrated HERE Maps for route visualization, polylines, coordinate validation, routing parameters, and map-based workflows.
- Improved frontend performance and data loading through pagination, rendering optimization, and more efficient API/state interaction patterns.
- Implemented and maintained unit tests and frontend quality practices.
- Contributed to backend services using Java 17 and Spring Boot, including REST APIs, business logic, testing, and troubleshooting.

Spartans Dev — Co-Founder & Software Engineer — Part-time

Colima, Mexico | Feb 2025 – Present

- Co-founded a software development startup focused on custom technology solutions for small and medium-sized businesses, with systems in production used by real clients.
- Developed and maintained a multi-branch POS and inventory platform, including products and variants, branch/location management, inventory, and sales workflows.
- Developed a clinical CRM in Next.js with Prisma, including patient management, therapy sessions, scheduling, billing, contracts, and PDF reporting.
- Contributed to engineering standards through reusable UI components, Zustand state management, validation, testing, GitHub Actions, and CI/CD.
- Administered GCP Compute Engine infrastructure hosting production products, including deployments, monitoring, backups, SSL/TLS, and resource management.
- Built solutions using React, Next.js, TypeScript, Node.js, Java, Spring Boot, PostgreSQL, Prisma, and GCP.
- Selected client project: Razo Morales y Asociados — developed a customized web platform supporting appointment management, client workflows, and organizational operations.

Xilion.io & Kiotrack S.A. de C.V. — FullStack Software Engineer — Frontend Focus

Colima, Mexico | Sep 2018 – Jul 2024

- Developed web, backend, and desktop applications across multiple products, working across frontend, backend, databases, and infrastructure.
- Developed modern web applications with React and Next.js and built reusable components and shared tooling.
- Developed Java desktop applications using Java, JavaFX/FXML, and Swing, including NFC, QR, printing, synchronization, and Linux integrations.
- Developed REST services and backend applications using Java 8, Spring MVC, JSP, Laravel, and PHP.
- Led web performance initiatives for Yimi Web and Yimi POS, including monitoring dashboards and optimization strategies.
- Implemented CI/CD practices that reduced deployment times by more than 80%.
- Administered GCP virtual machines and Linux environments, including Nginx, reverse proxies, PM2, SSL/TLS, and application deployments.

Archivo Histórico del Estado de Colima — FullStack Developer

Colima, Mexico | Feb 2018 – Sep 2018

- Developed a film administration platform, designed its MySQL database, optimized queries, and migrated information from Excel files.
- Contributed technical solutions based on client requirements.

SELECTED PROJECTS & ACHIEVEMENTS

Vita-Data — ENEIT 2017 Innovation Project. Systems Team member on a multidisciplinary healthcare technology project combining hardware and software for real-time patient monitoring. **1st Place — Local Stage; 1st Place — Regional Stage; National Stage Recognition.**
RAZO CRM. Next.js, React, Prisma, Google Calendar, WhatsApp, and Resend. Developed dashboards, appointment workflows, reports, API endpoints, automated WhatsApp reminders, and email services.
Nvita API. Node.js, Express, TypeScript, and Prisma. Developed REST API functionality, data models, CRUD workflows, invitations, and validation.

TECHNICAL SKILLS

Frontend	React, TypeScript, JavaScript, Next.js, Zustand, Redux, Context API, Tailwind CSS, SCSS, HTML5, CSS3
Backend	Java 8/17, Spring Boot, Spring MVC, JSP, REST APIs, JPA/Hibernate, Laravel, PHP, Node.js, Express, Prisma
Desktop	Java Desktop, JavaFX/FXML, Swing
Data	PostgreSQL, MySQL, SQL, database design, query optimization
Cloud / DevOps	GCP, Linux, Nginx, PM2, Docker, Bash, SSL/TLS, Jenkins, GitHub Actions, Maven, Gradle
Integrations	HERE Maps, Stripe, Firebase Cloud Messaging, Google Calendar, WhatsApp, IdentityServer
AI	OpenCode, Claude Code, Antigravity, AI coding agents, AI-assisted development workflows
