Computer Systems Engineer with over 7 years of experience developing web applications, REST APIs, desktop applications, and cloud services, with a primary focus on frontend. Specialized in React, TypeScript, and Next.js, with additional experience in Java 8/17, Spring Boot, Spring MVC, JSP, Node.js, Express, Laravel, and PHP. Experienced in architecture, systems integration, performance, databases, CI/CD, and cloud infrastructure.

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript, Next.js, Zustand, Redux, Context API, Tailwind CSS, SCSS, HTML5, CSS3
Backend: Java 8/17, Spring Boot, Spring MVC, JSP, REST APIs, JPA/Hibernate, Laravel, PHP, Node.js, Express, Prisma
Desktop and Data: JavaFX/FXML, Swing, PostgreSQL, MySQL, SQL, database design, query optimization
Cloud / DevOps: GCP, Linux, Nginx, PM2, Docker, Bash, SSL/TLS, Jenkins, GitHub Actions, Maven, Gradle
Integrations e IA: HERE Maps, Stripe, Firebase Cloud Messaging, Google Calendar, WhatsApp, IdentityServer; OpenCode, Claude Code, Antigravity, and AI-assisted development

PROFESSIONAL EXPERIENCE

AI27 Predictive Intelligence S.A.P.I. de C.V. **Mexico City, Mexico**
Full Stack Software Engineer – Frontend Focus *July 2024 – September 2026*

- Led the frontend modernization and developed AIS features with React and TypeScript for shipments, carriers, operators, devices, licenses, routes, monitoring, and operational workflows.
- Migrated shared state from React Context to Zustand across a significant portion of the frontend, improving organization and scalability.
- Integrated HERE Maps for route visualization, polylines, coordinate validation, and map-based workflows.
- Improved performance and data loading through pagination, rendering optimization, and more efficient interaction with APIs and state.
- Implemented and maintained unit tests; also contributed to backend services with Java 17 and Spring Boot, REST APIs, business logic, and testing.

Xilion.io & Kiotrack S.A de C.V. **Colima, México**
Full Stack Developer *September 2018 – July 2024*

- Developed web, backend, and desktop applications for various products, working across frontend, backend, databases, and infrastructure.
- Led projects such as Arcos and YimiBus from their early stages, defining architecture, technologies, and communication between components, and coordinating frontend and backend staff.
- Built web applications with React and Next.js, reusable components, and shared tooling; built Java desktop applications with Java, JavaFX/FXML, and Swing, including NFC, QR, printing, and synchronization integrations.
- Developed REST services with Java 8, Spring MVC, and JSP, as well as solutions with Laravel and PHP.
- Led web performance initiatives for Yimi Web and Yimi POS, including monitoring dashboards and optimization strategies.
- Implemented CI/CD practices that reduced deployment times by more than 80%; managed GCP/Linux environments, Nginx, PM2, SSL/TLS, and deployments.

Historical Archive of the State of Colima (AHEC) **Colima, México**
Full Stack Developer *February 2018 – September 2018*

- Developed a platform for managing films, designed its MySQL database, optimized queries, and migrated data from Excel.
- Proposed and implemented technical solutions based on client requirements.

EXTRACURRICULAR AND PERSONAL PROJECTS

Spartans Dev
Extracurricular Software Developer | Colima, Mexico

- Participated in independent software projects for small and medium-sized businesses, outside of my employment.
- Developed features for a multi-branch POS and inventory platform: products, variants, branches, inventory, and sales workflows.
- Developed a clinical CRM with Next.js and Prisma for managing patients, sessions, scheduling, payments, contracts, and PDF reports.
- Implemented integrations with Google Calendar, WhatsApp, and email; contributed to reusable components, Zustand, validations, testing, GitHub Actions, and CI/CD.
- Worked with React, Next.js, TypeScript, Node.js, Java, Spring Boot, PostgreSQL, Prisma, and GCP, including deployments, monitoring, backups, and SSL/TLS.
- **De To'**: Custom web platform for sales, inventory, warehouse, customer workflows, and operations at De To'. Technologies: Next.js, React, Prisma, WhatsApp, and Resend.
- **RAZO CRM**: Custom web platform for appointments, client workflows, and operations at Razo Morales y Asociados. Technologies: Next.js, React, Prisma, Google Calendar, WhatsApp, and Resend.
- **Nvita API**: REST APIs, data models, CRUD operations, invitations, and validations with Node.js, Express, TypeScript, and Prisma.

EDUCATION

Bachelor's Degree in Computer Systems Engineering
Universidad ICEP, Colima, México | Degree awarded December 2025

Computer Systems Engineering
Tecnológico Nacional de México (TecNM), Colima Campus | Completed coursework through the tenth semester; no degree obtained from this institution

Delfín Summer Research Program
Universidad Politécnica de Querétaro | Jun–Jul 2018

ACHIEVEMENTS

Vita-Data — ENEIT 2017: Member of the Systems team on a multidisciplinary project for real-time vital signs monitoring. First place at the local and regional stages and recognition at the national stage.
